

PUBLIC EXECUTIVE BRIEF / ZHEJIANG, CHINA

Zhejiang Maritime Drone Market Entry

For maritime technology suppliers

An infrastructure-led market, with entry through differentiated technology and a capable Chinese prime.

RMB 227m

Evidence-backed project-value pool

84%

Outside direct UAV systems

87%

Concentrated in the top three value blocks

ENTRY ROUTE

Differentiated technology → Chinese prime / integrator → Local buyer
Sensors · payloads · docks · connectivity · mission software

Source: supplied Zhejiang procurement and project records; China Maritime Drone Intelligence analysis. Illustrative image, not an actual project or operator.

VALUE BRIDGE

Project value and annual demand

Cumulative attributable value is annualised by component life and service term.

CUMULATIVE PROJECT VALUE

RMB 226.9m

Maritime-attributable baseline
Public headline: RMB 227m market pool

ANNUAL DEMAND ANALOGUE

RMB 33.0m/yr

Annual demand analogue
Public headline: RMB 33m/year

01 Attribute

Attribute shared infrastructure to maritime use.

02 Annualise

Spread CAPEX by component life; recognize services by contract term.

03 Interpret

Read the output as a demand analogue, not realized supplier revenue.

RMB 227m ÷ four years is not the method. The result is not realized supplier revenue.

Source: supplied Zhejiang project evidence and component-life annualization model. Public version shows headline outputs and method only.

HOW THE EVIDENCE WORKS

A public record and its commercial meaning

The brief demonstrates the method; product-specific fit and action require a separate assessment.

Wenzhou Port Group

Port waters integrated service support

FRAMEWORK VALUE

RMB 4.8m

First-year award: RMB 1.5m

Term: 3-year framework, 1+1+1

Scope: vessel/UAV support and safety IT

Source identity

Official source, buyer, framework value, first-year award and term are preserved.

Package structure

The mixed service package is separated into UAV, information and consulting layers.

Status control

Framework value is not annual UAV revenue. UAV share is undisclosed; renewal depends on performance and internal approval.

THE COMMERCIAL QUESTION

Which technologies can enter the incumbent delivery stack, and when is the account externally contestable again?

Source: official Wenzhou Port Group tender and award records; supplied Zhejiang evidence ledger. Public proof only; product-specific fit, route and action remain protected.

PUBLIC EVIDENCE STATES

Planning signals and repeat-buyer evidence

Two public records illustrate different commercial states, without a client-specific action recommendation.

PUBLIC RECORD	VALUE / CONFIDENCE	EVIDENCE ROLE	RELEVANT TECHNOLOGY	STATUS
Coastal smart-supervision network	Not public Medium	Planning-stage infrastructure signal	Unattended UAV Sensing Coastal monitoring	PLANNING
Daxie terminal UAV procurement records	RMB 0.124m RMB 0.318m	Repeat-buyer signal; continuity under review	Terminal UAV Operations Account lifecycle	AWARDED

ADDITIONAL RECORD FAMILIES

Multi-dock platform expansion · Integrated maritime service · Long-range mission system

Product-specific fit, partner route and action remain part of the paid assessment.

Source: Zhejiang coastal smart-supervision planning coverage and official Zhejiang Seaport award records. Daxie 2025/2026 awards show repeated UAV-related buying by the same operator; project continuity is not yet proven.

BUYER ROUTES

Buyer type shapes the entry route

Observed patterns from Zhejiang procurement and project records.

BUYER / BUYING PATTERN	TECHNOLOGY LAYER	LOCAL ENTRY ROUTE	TIMING / ENTRY QUESTION
Maritime / SAR Mission-led buying	Long-endurance EO/IR · sensing Resilient CNS	Chinese UAV OEM / mission-system integrator	Before model / specification freeze Can you improve endurance, sensing or link reliability?
Port / digital Hardware can lock	Docked UAV AI inspection · payload API	Local hardware / telecom / software prime	New site, module or expansion trigger What can you add without replacing the locked layer?
Public security Integration-heavy	RF · Remote ID Counter-UAS · EO/IR	Public-security ICT / telecom prime	Procurement intent / pre-tender Can your module fit behind a local security integrator?

Source: Zhejiang procurement and project records; buyer/mission patterns are public-safe synthesis. Opportunity-specific partner mapping remains paid.

MATCHED-RECORD SAMPLE

One product line. One public record.

A free check of China-market relevance before a paid research screen.

You provide

Product or product line

Target maritime mission

Current China-market question

You receive

One public Zhejiang record
buyer · mission · project · status

Why it may match
technical environment and one
unresolved entry question

Source controls

Source link and exact status

Public facts separated from analyst
interpretation

No fit conclusion

NOT INCLUDED

Fit score · partner names · account ranking · 30-90-day action plan

No fee / no obligation. If relevant, continue with a fixed-scope Founding Vendor Screen.
